

DOVER PROPERTY LEVEL FLOOD RESILIENCE

“

...we wish to let you know how very pleased we were with the attitude, work and professionalism of your team...minimum of mess and fuss and to a very high standard

Mr A Rouse & Ms A Russell, Residents

	£85,000	3 weeks
Client	Value	Duration

We were awarded this contract to supply and install Flood Mitigation products to twenty three properties in Dover.

A wide range of Property Level Flood Resilience solutions were provided on a bespoke basis to meet the needs of each individual property.

This included the fitting of Whitehouse Flood Doors, automatic airbricks, NRV's, and flood boards.

A number of properties were below road level, therefore extensive ground reprofiling was undertaken around these properties to divert the path of surface water away from all apertures.

Pre-start Flood Fairs were held

for all homeowners, enabling them to meet our highly skilled, trained and experienced Flood Mitigation teams.

This interaction also enabled homeowners to browse products that would be installed in their homes, to suit both aesthetically, and practically, their individual needs.

After installation, our teams ensure homeowners are satisfied with the measures installed, are trained effectively on how to deploy them, and understand the maintenance each measure requires.

All works were undertaken by our directly employed personnel ensuring safe, efficient delivery to a high quality standard.
